

R & D Enterprises Joins TSM

R&D Enterprises, a leading designer and manufacturer of high-quality engineered oil coolers and heat exchangers, will soon be joining forces with TSM! Recognized worldwide for product quality, reliability and innovation, R&D will further enhance TSM's manufacturing abilities, product lines and service.

R&D designs and manufactures products for recreational boats, commercial marine vessels, industrial usage, truck and automotive applications, and agricultural equipment installation. They use state-of-the art technology, including computer-aided programs, to develop their products.

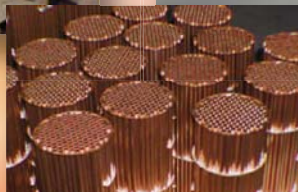

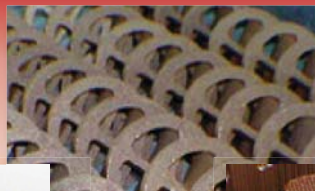

Their commitment to innovation includes an in-house research and development lab that offers complete prototype capability. The company holds multiple patents for original designs, and is ISO 9001:2008 certified. With a continuous improvement system in place to ensure that quality is built into every product they make, R&D proves its commitment to quality from concept, to design, to delivery.

To meet the needs of low-HP engines — to engines with 10,000 HP and more — R&D designs and builds a variety of cooling products from materials such as copper, copper-nickel, brass and stainless steel, including:

- Charge air coolers
- C28 - Modular Heat Exchanger (Patented)
- Engine oil coolers
- Engine water coolers
- Fuel coolers
- Heat exchangers
- Hydraulic oil coolers
- Plate coolers
- Polymer oil coolers
- Power steering oil coolers
- Transmission oil coolers
- Combination coolers in tandem
- Tube bundle oil coolers

R&D Enterprises has been producing high-quality, innovative products for nearly 40 years. We're proud to welcome their knowledge, expertise and extensive manufacturing capabilities to the TSM Team. www.thermalsolutionsmfg.com
